

CORVIC.AI

# Generate High-Quality Results from Your Complex Enterprise Data

By leveraging Corvic's product, complex data can be turned into high-quality insights.

## The Challenge

Enterprises face persistent challenges in leveraging their vast and complex internal data for effective decision-making. Traditional GenAI solutions often prove inadequate, hindered by issues such as hallucinations, limited data coverage, and an inability to understand or reason across structured and unstructured formats. These limitations are particularly acute when dealing with multimodal multi-structured data, such as documents, tables, and images, where conventional tools struggle to deliver reliable, explainable outputs.

## The Solution

Corvic's GenAI Cognitive Infrastructure was deployed, integrating its proprietary Mixture of Spaces™ and Adaptive Chain of Action™ technologies to transform disconnected, unstructured data into structured, actionable intelligence. This platform enabled a domain-specific agent to parse,

reason, and extract insights across PDFs, images, and tables, without the need for manual pipeline stitching or risk of hallucinations, delivering only verifiable results.

## The Outcome

The pilot demonstrated a 20–30% improvement in response accuracy compared to baseline GenAI tools. It provided real-time, explainable insights from complex manufacturing documents and data tables, significantly reducing the need for expert intervention. Looking ahead, the focus is on expanding to a wider range of data sources, enabling on-demand data augmentation, and deepening integration with existing enterprise knowledge systems.

## Project Highlight

27% boost in accuracy, 3x cost savings, and reduced productivity timelines from months to hours.

## Corvic.ai

Corvic.ai generates insight from complex data while improving productivity

By leveraging Corvic's product, complex data can be turned into high-quality insights.

### Headquarters

Mountain View, United States

### Founded

2023

### No. Employees

11 – 50

## About STARTUP AUTOBAHN powered by Plug and Play

STARTUP AUTOBAHN powered by Plug and Play is an open innovation platform that provides an interface between innovative tech companies and industry-leading corporations.

The basis of the program is the partnership that develops between startups and the corporate business units. The two entities hold an equal footing from the get-go: together they evaluate the potential for a joint venture, move forward to pilot the technology, and work to achieve the ultimate goal – a successful production-ready implementation.

Designed with the intention to exceed startup acceleration, STARTUP AUTOBAHN powered by Plug and Play moderates a community for collaboration with a focus on implementable results.

Over the years, the platform has successfully cultivated over 500 projects with more than 350 startups since its founding in 2016. ■
